

Maintenance Technician (INT09)

This role is a full time (37.5hr) permanent position working onsite at our Lane Cove Facility.

The role of Maintenance Technician forms an essential part of the facility and maintenance operations within the company. It involves efficiently carrying out day to day repairs and maintenance tasks which are associated with the site, services, plant and equipment.

Major functions of the role include (but are not limited to),

- Performing preventative maintenance tasks as per the preventative maintenance schedule relating to equipment, critical systems and services such as
 - o Purified water systems
 - o Boilers
 - o Trade waste systems
 - o Filling and packaging equipment
- Attending to breakdowns and troubleshooting faults with equipment, critical systems and services
- Reporting breakdown root causes and concerns with management.
- Documenting works undertaken and recording in CMMS within a GMP compliant change control environment.
- Coordination with external service providers for maintenance and repair activities to meet business needs.

To be successful in this role you will require the following,

- Technical proficiency in equipment maintenance with trade qualification and at least 5 years of experience.
- At least 3 years of experience within pharmaceutical or similarly regulated environment (eg, veterinary, medical device or large scale food manufacturing) with good knowledge of cGMP or similar system requirements.
- Knowledge and experience with systems and services such as
 - o Purified water systems
 - o Boilers
 - o Trade waste systems
 - o Filling and packaging equipment
- Knowledge of Computerised Maintenance Management Systems (CMMS) and a basic use experience as a minimum.
- Competence with computerised control systems used for equipment operation and facility monitoring.
- Good written and verbal communication skills with ability to develop and maintain professional relationships with internal and external stakeholders
